TEMPO FACEBOOK PRESENCE BOOMS!

If you haven't visited [Tempo's Facebook page](#) lately, be sure to check it out. We now have over 2,000 followers. That's a huge increase from the 112 we had in early May! We've been working hard to post relevant content to best meet our followers' needs.

In addition to our Facebook page, we also launched a special [Tempo Insider Deals & Giveaways Group](#) on Facebook. This is the place to be for special insights, deals and promotions, and of course, free tools! It's also a forum to share best practices and learn from our collective expertise.

Starting on Tuesday, July 7, 2020, our weekly Facebook LIVE events will only be available to members of this exclusive group—so join today! So far we've given away a pocket multimeter each week!

Aside from Facebook, remember, we're also still on [Instagram](#), [YouTube](#), [LinkedIn](#) and GoogleMyBusiness [@TempoComms](#).

A MULTIMETER FOR EVERY TECHNICIAN

Tempo has launched a family of multimeters with features and functions to address the needs of every technician. Three models are available: PM100 Pocket Multimeter, MM200 Multimeter, and MM810 Multimeter.

The PM100

(CAT-III 300V, CAT-II 450V) is an accurate, automatic, pocket-sized "6000-count" meter that deserves to live in every technician's (or homeowner's) tool bag, if not pocket.

[Learn More](#)

The MM200

(CAT-IV 3000V, CAT-III 600V, CAT-II 1000V) is built to international standards and performs all the tests any technician would want from a multimeter. Features like "BeepJack" help prevent damage when leads are attached to the wrong terminals for the type of test selected. Fully auto-ranging or manual—the choice is yours!

[Learn More](#)

The MM810

(CAT-IV 1000V) is an advanced multimeter geared toward professional technicians and electricians. The MM810 is an extremely accurate, high precision, True-RMS (TRMS), dual display multimeter with all the measurement features one is likely to need in the field.

TEMPO LAUNCHES PREMIUM FUSION SPLICER AND CLEAVER

Tempo Communications has raised the bar once again with the launch of its [FSP200 Optical Fusion Splicer](#) with core alignment technology and the [FCL200 Optical Fiber Cleaver](#) with auto-end cut collection. The compact and versatile fusion splicer, and the precision-oriented cleaver are the newest members of Tempo's comprehensive fiber solutions portfolio and are designed for the technician who demands premium performance and efficiency.

The FSP200 delivers core alignment technology in the form of six precision motors for low splice loss when tackling the most complex fiber geometries. An exclusive feature also allows technicians to splice loose-tube fiber to Tempo Splice-on Connectors with patented adaptor technology to save time and money.

"The features and benefits of the FSP200 are numerous," said Keith Foord, fiber instruments product manager with Tempo Communications. "The end-user gets core alignment technology, the ability to splice 200 micron 'micro' fibers, and an IP52 Ingress Protection Rating which means it's water and dust resistant. All of this versatility and adaptability is delivered in a compact, easy-to-use design."

A new Optical Fiber Cleaver, the FCL200, is also available to complement the FSP200. The FCL200 features precision-engineered blades to cleave fiber with minimal loss. To promote splicing efficiency, cleaved fiber remains in the adapter ready to splice and is also compatible with other Tempo fusion splicer models in addition to the FSP200 (910FS, 915FS). Field tested to optimally perform, the cleaver's dust bin safely collects end cuts.

Tempo remains an industry leader in delivering relevant, comprehensive test and measurement solutions at a variety of price-points to ensure that every technician has the tools and equipment to get the job done right the first time. Be on the lookout for more exciting and innovative fiber tools from Tempo in the near future.

WE MISS SEEING YOU!

As more and more tradeshows are canceled for 2020, Tempo is looking into other options to engage with our fans and customers, including virtual events, Facebook Live events, webinars and videos.

As mentioned previously, Tempo has been deemed an essential business during the COVID-19 crisis. We've implemented safety measures to protect our staff and are working diligently to manufacture and ship the products you've come to rely on for quality, durability and performance. [CLICK HERE](#) for more information.

Stay-tuned for more information as it becomes available and we look forward to connecting again soon, either in person or online!

If there is a topic you'd like covered, please send your questions to troy.anderson@tempocom.com
