TEMPO COMMUNICATIONS

FOLLOW TEMPO ON INSTAGRAM & WIN FREE STUFF!

Many of you follow us on Facebook and are members of our Tempo Insider Deals & Giveaways Group. We now have more than 25,000 followers and over 4,500 group members! We appreciate the support and love sharing the latest news, demonstrating products, and giving away free tools and swag to our loyal Tempo Insiders!

As we continue to build our Facebook presence, we are also turning our sights to Instagram. For those who already follow us on Instagram, you have probably noticed that we are trying to post unique content and not just replicate what we have on Facebook.

TEMPO INSIDER GROUP MEMBERS AND FACEBOOK FOLLOWERS:

you need to be following us on Instagram too! Instagram is another great way to stay in the know and connect with Tempo. In general, our Instagram posts tend to be shorter in terms of written content and more visual, and typically encourage viewers to visit our Link in Bio page at www.lnk.bio/tempocomms.

Right now, we have around 250 Instagram followers and we are determined to grow this exponentially. From now until the end of March, we are running an Instagram contest and will be giving away hand tools to 30 new followers! Just follow us on Instagram and complete this form: www.tempocom.com/instacontest.

TEMPO COMMUNICATIONS LAUNCHES...

INSERTION & EXTRACTION TOOL

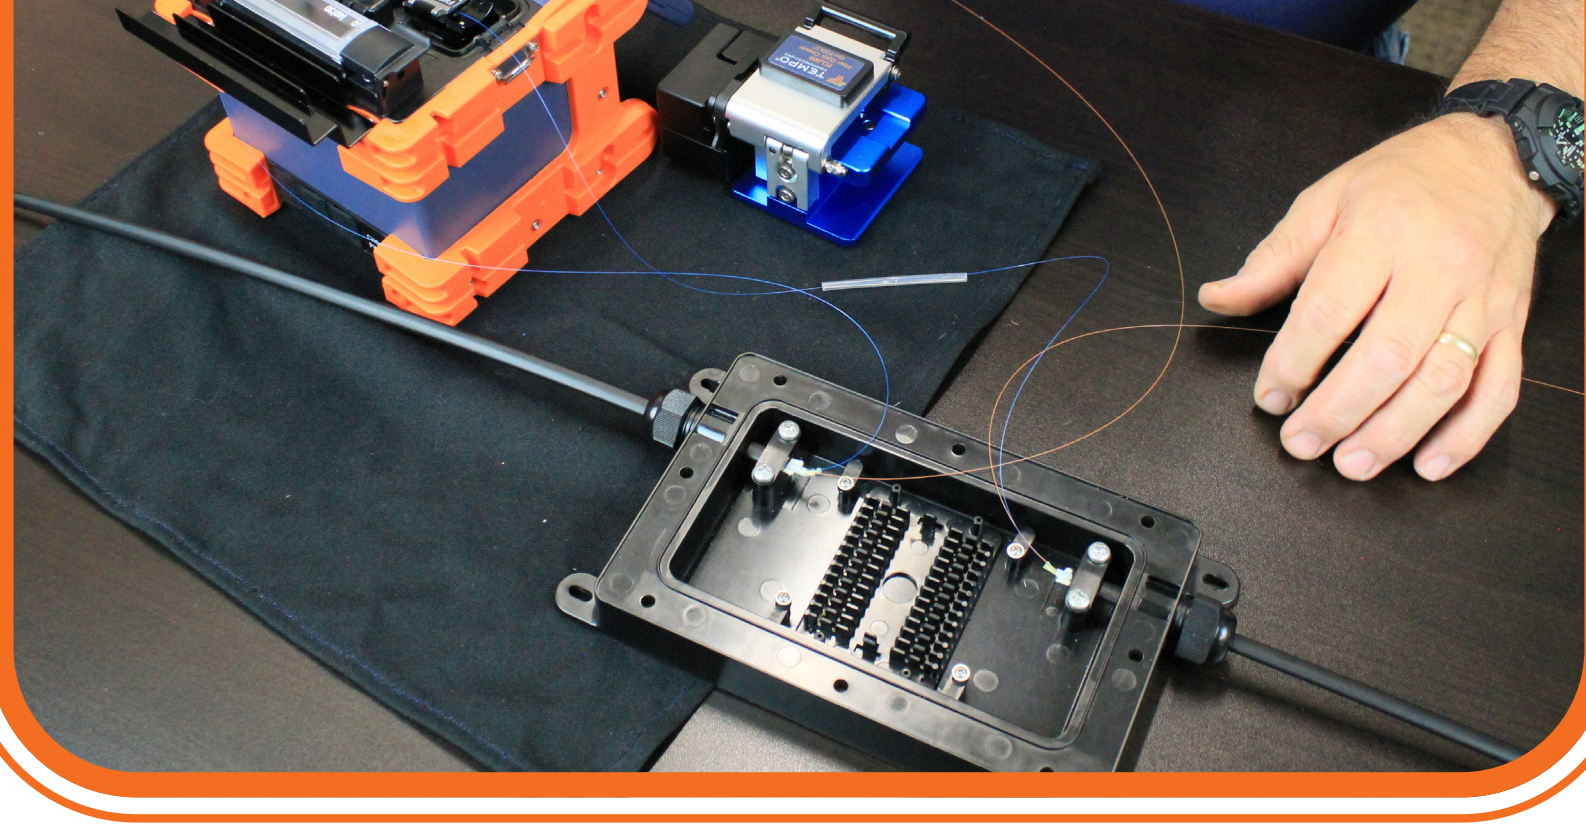

DESIGNED FOR TIGHT SPACES

The Paladin-branded **TCEXT** is used to remove and insert LC, SC and similar connectors into bulkheads where the technician's fingers may not fit especially in congested cabinets.

Aside from being rugged, durable and easy to use, the **TCEXT** features include a secure clamping mechanism to seamlessly insert and remove connectors as well as an ergonomic and lightweight design to promote precise alignment. And, because it carries the Paladin name, the **TCEXT** comes with a limited Lifetime Warranty. Paladin hand tools, manufactured by Tempo Communications, remain an industry favorite when only the best will do.

DFE100 DROP FIBER ENCLOSURE KIT

SAVES TIME & MONEY BY SIMPLIFYING FIBER OPTIC INSTALLATION & REPAIRS

The newly upgraded **DROP FIBER ENCLOSURE KIT (DFE100)** conveniently and cost-effectively allows the fiber technician to repair and protect fiber optic cables. The IP68-rated DFE100 houses and protects up to 12 fusion splices and two mechanical splices in a secure plastic casing that can be buried or mounted for future rework.

The **DFE100** provides a splice point location within the network build as well as a demarcation point at the premises—making it an ideal solution for both installs and repairs. It joins Tempo's long list of comprehensive fiber solutions which are designed for technicians who demand performance and efficiency.

Tempo's new **DFE100** supports common fiber sizes of 8.1mm, 5.4mm, and 3.0mm and 5.1mm rectangular cables and 5.1mm round cables with provided individual sealing gaskets. The plastic casing can be easily assembled with common tools and the IP68 rating ensures that the enclosed splices will be safe from dirt, moisture and the elements.

"This Drop Fiber Enclosure Kit is really a game-changer for the fiber technician," said Keith Foord, fiber instruments product manager with Tempo Communications. "It can handle up to 14 splices and ensures they are safely protected either underground, on the side of a building, or pole mounted. After the initial install, a technician can re-enter the DFE100 to address future issues and be confident that the enclosed cables will remain protected afterwards."

TEMPO KNOWS BETTER THAN ANYONE THAT CLEAN FIBER IS HAPPY FIBER!

Tempo recently added to its comprehensive fiber solutions portfolio with the launch of the **Opti-Clean Reel Cleaner** and **Cleaning Swabs** to properly clean fiber optic connectors and ensure optimal performance of fiber networks. One of the biggest hurdles a fiber technician faces is ensuring that fiber is clean and free of contaminants, adhering to the tenet that clean fiber is happy fiber. These latest products from Tempo make cleaning fiber bulkheads and connectors easy and convenient.

The **OPTI-CLEAN REEL CLEANER** is an essential tool used to clean fiber optic connectors. It is the best dry method for cleaning fiber optic termini such as SC, LC, FC, ST, E2000 and other common connectors. The Real Cleaner is powered by lint-free, anti-static cleaning tape which effectively and efficiently cleans the entire ferrule end face. The cleaning tape can be easily replaceable with disposable fiber spools.

[LEARN MORE](#)

The **FIBER CLEANING SWABS**, available in 1.25mm and 2.5mm sizes, are the perfect partner to use with the Reel Cleaner as they get to spots that it cannot reach. The precision swabs are used to clean bulkhead ferrules and inside mating sleeves. As a result, they clean the entire ferrule end face. The disposable swabs are intended for single use and come in packs on 100.
