

# TEMPO COMMUNICATIONS:

## WHAT'S IN A NAME?

### NO ONE KNOWS COPPER & VDV LIKE TEMPO!

Do you know we have a range of test and measurement equipment and tools for the technician working not just with copper, but also:

- Fiber
- Ethernet
- Wi-Fi
- Buried Utility Detection & Location
- RF safety
- And coming soon, tools and test equipment for 5G

Our goal is to deliver innovative, job-specific tools and test equipment at the right price for every technician across the globe. We are headquartered in Vista, California (US) and have a EMEA headquarters in Cwmbran, Wales.

### 1984

The Tempo story started...

in 1984 as Tempo Research Corporation, a company renowned for its high-quality and reliable SideKick, and other copper test and measurement equipment aimed at the communications technician.

### 2001

Tempo was acquired

by Greenlee Textron, Inc. as it focused on growing its telecommunications portfolio. Prior to acquiring Tempo, Greenlee Textron had also purchased Progressive Electronics, known for its legendary tones and probes like the 701K-G and locator products; and Chesilvale Electronics, known for its telephone test sets and Industrial Technology, known for its OmniMarker electronic marker balls and Throwmaster line for test sets. In 2008 Tempo's name was changed to Greenlee Communications to fall under Textron's Greenlee umbrella which also included Greenlee Electric.

In the early 2000's, Greenlee Textron also added RIFOCS Corporation (fiber products and cable assemblies), Datacom Technologies (LAN Testing) and Opto Electronics (fiber fault location, optical power meters, and high resolution OTDRs) to its expanding line up.

### 2018

Greenlee Textron was acquired by Emerson Electric. By this time, Greenlee Communications had expanded its test and measurement equipment offerings to also include solutions into areas like Ethernet and Wi-Fi®.

### 2019

On January 31, 2019

The Greenlee Communications business was purchased by a group of private investors and its name was officially changed to Tempo Communications, Inc., bringing the company back, full circle, to the trusted name with which it began back in 1984.

Along with the acquisition and rebirth of Tempo Communications came the professional grade Paladin line of hand tools with a limited lifetime warranty as well as the DataShark "do-it-yourself" family of hand tools, priced and designed to empower homeowners.

Because of our long history, we know telecommunications and we know how to deliver relevant solutions that solve the problems faced in the field. Tempo proudly offers a comprehensive line of reliable, industry-leading test and measurement solutions to address all stages of network deployment, enabling the development, installation, and maintenance of xDSL, Fiber, Cable, Ethernet, Wireless and Irrigation networks.

From our tried-and-true copper and locating solutions to innovative launches in fiber, Wi-Fi testing, RF Safety and 5G—we continue to evolve to ensure our customers have the latest and greatest options to best address the challenges facing today's complex networks.
