Your important contribution to climate protection

Dear Mr Jentjens,

Climate change and environmental destruction pose tangible threats to Europe and the entire world. This is where the „European Green Deal“ comes in, which calls for a reduction in net greenhouse gas emissions to zero and the establishment of a functioning circular economy by 2050.

Together with you, we are already working towards achieving these goals. The results of our joint efforts are confirmed annually by the Fraunhofer Institute UMSICHT in its „resources SAVED by recycling“ study. In 2019 alone, we were able to save more than 4.2 million tonnes of climate-damaging greenhouse gases within the ALBA Group by processing 6 million tonnes of recyclables in a closed loop. This represents around one percent of Germany’s total carbon savings when comparing 2019 with 1990 annual emissions. In other words, by partnering with us, you too are making a significant contribution to climate protection. And together with you, we continue to work every day on achieving our vision of a world without waste.

We will be happy to confirm your personal contribution with our annual „resources SAVED“ certificate. You can easily download the current certificate and supplementary graphics for your public relations work from our portal. The portal also gives you access to the certificates of previous years.

Certificate resources **SAVED** 2020

Tempo Communications Inc.

declared the following types of material in Germany in 2020:

Material type

PE/PP/mixed plastics
Paper/Cardboard/Board

By recycling these materials, a calculated
1,499 kilograms of resources and,
in addition to this, **186 kilograms of greenhouse gases** were saved.*

We want to thank you on behalf of environmental and climate protection!
